The Right Storage Solution for Every Need

SLOTTED ANGLE SHELVING SYSTEM

Slotted angles are manufactured using the state of the art CNC controlled continuous roll forming machines having high quality progressive tooling which ensures high accuracy in punching of the slotted angle.

High strength hot rolled steel is used to make the slotted angles in sizes of 40 mm x 40 mm, 40 mm x 60 mm & 40 mm x 80 mm in different lengths upto 3600 mm in length (lengths up to 6000 mm is also possible on request).

Our slotted angle system is an all purpose framing system having pre punched holes pattern which can be bolted together to make economical shelving, racking, binning, work tables, trolleys, mezzanine floors which can be tailor made as per the customers requirements.

Designed to be a truly multi-purpose product, Eagle Storage Systems slotted angle's will provide self-assembled, simple and fast solutions to many of the challenges of your warehouse, factory or construction site.

Available in 3 standard sizes, slotted angle sections come powder coated or galvanized as per customer requirements and are easily cut down to size (using the cutting marks on the system) and bolted together to form a range of products.

Each structure can be easily modified or disassembled so that the components can be reused.

The angle and hole spacing allows any sections of slotted angle to be fitted together.

The placing and dimension of the slots provides the maximum possible number of bolt connections.

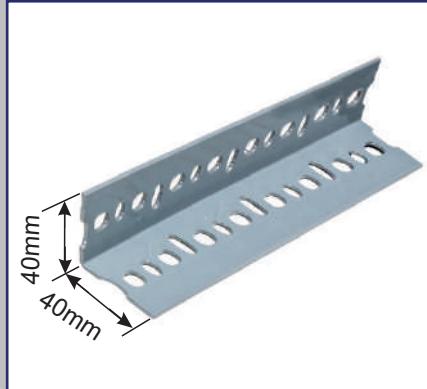

Steel Corner plates in two sizes are available these provide bracing at angle joints.

Single and double plastic base plates are available and can be used to protect the floor by fitting them to the end of the vertical struts.

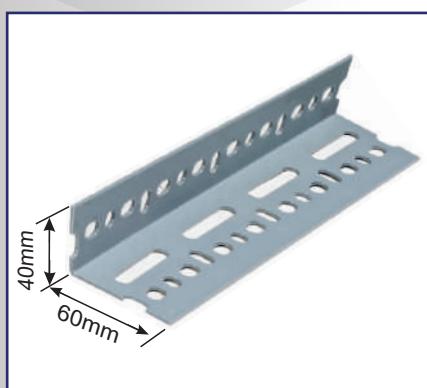

Eagle Storage Systems Slotted Angles are use to create bespoke storage solution. Slotted Angles can be used time and time again, wherever and whenever you need it
